Data storage apparatus.

Data input from a key switch (3) is displayed on a liquid crystal display (2), and whether to store the data in a RAM (6) or an EEPROM (7) is selected by a selection switch. If the EEPROM (7) is selected, a CPU (4) turns on a power switch (10) to apply a high voltage to the EEPROM (7) to write the input data therein. Data stored in the RAM (6) and the EEPROM (7) are read out upon operation of a search switch and are sequentially displayed on the liquid crystal display (2). It is clearly informed whether the currently displayed data is read out from the RAM (6) or the EEPROM (7). With this operation, if data which is required to be protected against disconnection of a power supply voltage or a drop in power supply voltage is stored in the RAM (6), the data can be stored in the EEPROM (7).

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claims:
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

See Sheet B.

- ☐ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☒ None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims: 1-4, 6-8, 9-12, 14-19, 21-23

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims 1-4,6-8,9-12,14-19,21-23: Cooperation
EEPROM, RAM & display properties.
2. Claims 5,13,20: EEPROM & RAM with different voltage
supplies.
